

**Flood detector  
WM5**

Art. No.  
**100091380**

Flood detector WM5 is used to detect water ingress. The flood detector detects the rising water with the help of 2 electrodes.

The flood detector is designed for connection to the technical inputs (hazard alarm control panels, transmission devices), multi-functional inputs (MS 232, MS 221) or contact inputs (FWA-BM 143).

Messages are synchronized and will not be saved.

The sensor is accommodated in a housing that is sealed on all sides.

- Suitable for floor and wall mounting
- Operating temperature -10 °C to +60 °C
- Degree of protection IP67
- Length of the cable 5 m
- Dimensions (WxHxD) 53x47x18 mm
- Color White
- Current consumption in quiescent state approx. 11 µA
- Current consumption during alarm approx. 200 µA
- Supply voltage 3 V DC to 20 V DC
